

3" Flanged Internal Valves for Bobtail Delivery Trucks, Transports and Large Stationary Storage Containers TA3217C & TA3217DA

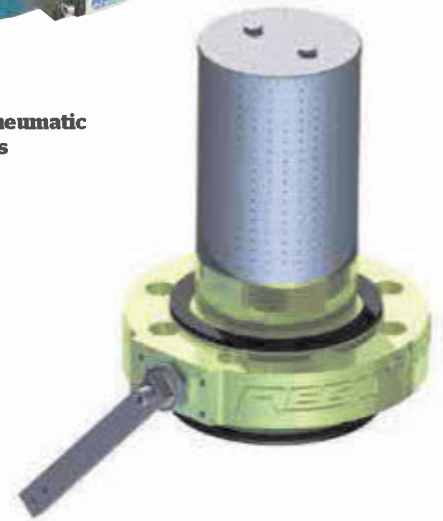

Application

Designed primarily for CO2 filling and/or withdrawal on delivery trucks, transports and stationary storage tanks with flanged pumps or piping. Installation is quick and easy, and the valve may be operated manually by cable or pneumatically.

Lever available on right or left side to allow for installation without the use of an extra pulley.

TA3217RA and Pneumatic Actuators
